A dialog box titled "Schema Editor Extensions" with a close button (X) in the top right corner. It contains a table with four columns: Name, Description, Version, and Extension Class. The table has two rows. The first row is checked and the second row is not. At the bottom right, there are "OK" and "Cancel" buttons.

Name	Description	Version	Extension Class
<input checked="" type="checkbox"/> Flat File Extension	Provides support for flat fi...	3.0.1.0	Microsoft.BizTalk.Flat...
<input type="checkbox"/> Hws Extension	Hws Extension Description	3.0.1.0	Microsoft.BizTalk.Hws...

# Fig. 8

A "Properties" dialog box for a "Root Record". It contains several sections: "Instance XPath" with a text field containing "//\*[local-name()='Root' and ...", "Max Occurs" and "Min Occurs" both set to "1", "Namespace" set to "http://BizTalk\_Application\_Pr...", and "Node Name" set to "Root". Below these are two expandable sections: "My Adapter category" and "My special category". "My Adapter category" has two "myprop" entries, both set to "Zero". "My special category" has four entries: "Prop1" set to "0", "Prop2" set to "constant string", "Prop3" set to "Microsoft Sans Serif, 8pt", and "Prop4" set to an empty field. There is also a "SqrtProp1" entry set to "0". At the bottom, there is a "Parse" section with a "Prop2" entry set to "This is property 2". The dialog has a "Properties" button and a "Dynamic Help" link at the bottom.
